

Systems. Automation. **No BS.**

# Workflow Solution

---

Serious Automation. Smarter Pricing.

# Because Papers Get Lost

---

## Unify Your Operations with Confidence

Flow4Every1 brings your processes, approvals and documents into one connected workflow inside Microsoft Teams, Outlook and SharePoint.

---

## Eliminate Manual Processes

Flow4Every1 replaces repetitive manual tasks with simple automated workflows.

---

## Workflows for operational efficiency

Streamline workflows to improve efficiency, reduce delays and keep operations moving.

# Your Processes Seamlessly Connected

---

## ERP Integration

Integrates with most ERP's, including Sage, Business Central and on-premises systems. Also available as a standalone solution.

## Cost-Effective Workflow Automation

Around half the cost of most workflow solutions, built for SMBs.

## Multi-Company

Built for multi-entity teams centralising approvals, documents and data.

## Unlimited Workflow Capabilities

Create and implement workflows from month-end tasks to ad-hoc payment approvals.

## Multi-Level Approvals

Three approvers per flow - enforcing governance and compliance.

## Document Management

Attach up to 10 files per flow for complete financial documentation.

# Automated Workflows

## Smarter Business

### Benefits You'll See Across Your Entire Business

Flow4Every1 reduces manual admin, speeds up approvals and improves control across finance and operations.

Built to simplify everyday work while improving accuracy and compliance.

### From Manual Work to Automated Flow

Replace spreadsheets, email chains and manual follow-ups with simple automated workflows that keep processes moving and reduce bottlenecks.

Improve visibility with clear workflows that help you track progress and stay in control.

### The Impact on How Your Teams Work Every Day

Teams manage requests, approvals and documents directly in Microsoft Teams and Outlook.

Workflows stay structured, visible and easy to follow - with less chasing and fewer delays.
